THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The Tecuci airport is located at the western limit of Tecuci, about 1.5 kms from the center of the city. The Tecuci-Marasesti road passes along the southern side of the airport. The Tecuci-Marasesti single track railroad line also passes about 100 meters from the southern side of the airport. The Tecuci-Barlad railroad line passes along the eastern side of the airport.
2. The terrain of the airport is flat and with the exception of the side towards the city, the approaches are open. Ever since World War I this field has served as a military airport. It is covered with grass and is slightly sloped, with a good drainage in case of rain, and can thus be used in any kind of weather. About 300 meters east of the airport, the Air Force barracks with a capacity of about 2,000 soldiers are located. The first three hangars, located near the road, are constructed of wood and are fireproof. They are covered with metal sheeting. The last four hangars are made of brick with metal skeleton.
3. Approximately 30 airplanes are based at the Tecuci field and a Soviet bombing unit is currently stationed there. This unit is equipped with bi-motor airplanes of the Boston type, presumably numbering about 6. There are also 20 Stormoviks and 4 liaison planes of the P. II type. A wooden barn, about 100 meters in length, houses varied caliber anti-aircraft guns and heavy Soviet antiaircraft machine guns. The airport has a triangular shaped radio station with a metal aerial, presumably mobile (mounted on a car).
